

Case Submission Form
2018 Western Conference of Veterinary Diagnostic Pathologists
Newport, Oregon – September 7th and 8th

Diseases of Animals Living In, On, Over or Around Water
and
Diseases of Camelids

Our hope is to dedicate a full-day of the conference to diseases of aquatic animals and a half-day to diseases of camelids. So, we encourage the submission of case material representing a wide range of aquatic species – including invertebrates and animals raised in aquaculture – and camelids: camels, llamas, alpacas, vicuñas and guanacos.

To submit case material for inclusion in the slide set and conference, please forward a completed copy of this form – electronically **and** as a hard copy – for each ‘case’. One block per case is preferred.

Please submit material at your earliest convenience, but by May 1, 2018.

Contributor:

E-mail address:

Affiliation:

Case and / or block identification:

Disease and / or morphologic diagnosis:

Etiology (if appropriate) or pathogenesis:

Case Introduction (as you would like it to appear in the case book, e.g., animal signalment, brief clinical history, gross pathologic findings, etc.)

For each submission, please include the following:

- this case submission form
- a block of paraffin embedded tissue
- one H&E histologic section of the block
- a specially stained section of the block
(if essential for proper interpretation)

Send everything to: Andy Allen
